

**Protects side
or rear door
padlock from
tampering.**

AVAILABLE WITH ABLOY 350 or
341/25 PADLOCK

Customized Keying Solutions

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your ABLOY padlock, Air Cuff Lock* and Hasp Lock can all be keyed alike. One key opens all of your locks.

Heavy Duty Hasp Lock for Trailers and Containers

The ENFORCER[®] #8000 heavy gauge stainless steel hasp features double thick welded tabs to protect the backdoor padlock from cutting or sawing attempts to remove it. The hasp is easy to install and provides maximum security for all trailers, reefers, dry vans and containers. Each set serves as its own template and comes complete with hardware and slide covers for inside fastener protection. Hasp is typically paired with a heavy duty ABLOY[®] padlock. ABLOY padlocks utilize rotating discs instead of the traditional springs and pins. This type of construction allows for reliable function in extreme environments.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
