

A Solid Stainless Steel Hasp Designed To Protect The Padlock From Tampering.

Easy To Install High Security For Side Or Rear Door Vans And Trailers.

The heavy gage stainless steel hasp features double thick welded tabs to protect the padlock from cutting or sawing attempts to remove it.

Combined with one of our ABLOY[®] locks, that use tumblers keyed to open with only one of 360 million combinations, most thieves won't have the tools or the time to bother.

Each set serves as its own template for easy installation and comes complete with hardware and slide covers for the inside fasteners.
