Portable, Easy To Install King Pin Lock
Makes Trailer Theft A Major Operation.

The unique conical aluminum alloy casting with an ABLOY high security locking cylinder make the ENFORCER King Pin Lock a formidable deterrent for quick, hook up and run trailer thieves. Very serious tools and time are required to remove it.

The lock uses tumblers as in a safe, keyed to open using one of 360 million combinations. Locks may be keyed alike, differently or to a master system matching additional ENFORCER locks you have or may want to add to your system.
