

**Secures dropped
truck trailer or
shipping container.**

Customized Keying Solutions

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

Heavy Duty Cylinders

ABLOY lock cylinders utilize rotating discs instead of the traditional springs and pins. Cylinder keyway face spins freely to prevent drill bits from penetrating the lock.

Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your padlock, King Pin and Adjustable Trailer Locks can all be keyed alike.* One key opens all of your locks.

Heavy Duty King Pin Lock for Trailers and Containers

ENFORCER[®] King Pin Lock #1111 is portable and easy to install. The lock is made of solid cast steel alloy. It covers and locks the king pin to prevent unauthorized trailer hook ups. An ABLOY[®] high security lock cylinder is integrated into the lock. ABLOY lock cylinders are designed with rotating discs, like the tumblers in a bank safe, instead of the traditional springs and pins. This type of construction allows for reliable function in extreme environments. Can be keyed individually or to a master system for fleets.

*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
