

Stainless Steel Cover And Padlock Prevents Unauthorized Seal Tampering.

A Portable, Easy To Install Cover For High Security Protection Of The Cargo Seals On Trailers And Containers.

The rectangular sleeve and pin slides up through the hasp to protect the back and sides of the seal. The stainless steel cover slips over the base and is padlocked to ensure the driver is in complete control of the access to the cargo seal during each delivery. A simple solution to the problem of unauthorized removal.

Included with the Seal Guard 5850 is an ABUS Diskus 28/70 Plated Stainless Steel padlock. The lock features maximum corrosion resistance, a 5 tumbler high security keyway and may be keyed alike or individually.
