**ROLL UP DOOR  
LOCK #8050**

**Locks roll up doors and eliminates driver's time and effort locking and unlocking a padlock on frequent deliveries.**

← Floor hardware, referred to as the "Boot"

### Quick Release Option

We offer an inside quick release option (#8051) for the Roll Up Door Lock. This add on allows locked roll up doors to be opened from the inside. This option is popular for safety and convenience reasons.

### Customized Keying Solutions

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

### Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your Roll Up Door Lock, Air Cuff Lock\* and King Pin Lock can all be keyed alike. One key opens all of your locks.

## Box Truck or Trailer Roll Up Door Lock

The Roll Up Door Lock automatically locks when the box truck or trailer door is closed. Often times this lock is referred to as a "slam lock". The lock is designed specifically to eliminate driver's time and effort needed to secure the trailer with a padlock and hasp system. This step is often skipped during a busy delivery schedule which can result in unlocked doors. The lock includes the lock body, mounting bolts (for dry van or refrigerated doors) and hardware that is welded to the truck or trailer floor. The unit is permanently installed and does not interfere with cargo handling. When the door is closed, the interior jaws spring open to close around the carbon steel pins in the base that is welded to the floor. Includes an ABLOY® lock cylinder or interchangeable core housing. The floor hardware is available in steel (#8050-ST) or aluminum (#8050-AL).

\*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
