**ENFORCER®**  
TRANSPORT SECURITY, INC.

**TRAILER LOCK  
BOX #8055**

**Automatically locks  
trailer keeper handle.**

### Heavy Duty Cylinders

ABLOY lock cylinders utilize rotating discs instead of the traditional springs and pins. Cylinder keyway face spins freely to prevent drill bits from penetrating the lock.

### Customized Keying Solutions

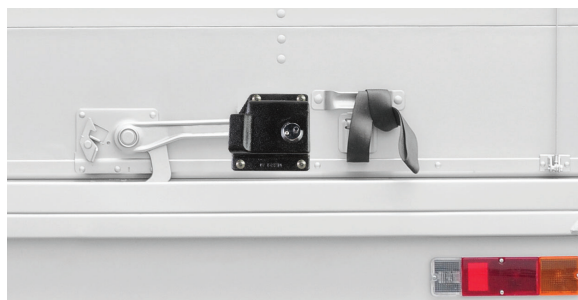

Locks can be keyed alike, different or different to a master system. Keys are made of strong nickel silver to provide smooth, reliable operation with lasting durability.

### Multiple Locks. One Key.

Master keying systems can be applied across various types of locks. For example, your Trailer Lock Box, Air Cuff Lock\* and King Pin Lock can all be keyed alike. One key opens all of your locks.

### Trailer Door Handle Lock Box for Roll Up Doors

The ENFORCER® Trailer Lock Box is permanently installed on the trailer door. The Lock Box replaces the standard trailer latch. The end of the trailer handle is inserted in the latching lock on the Lock Box. Lock is spring loaded to automatically lock when the handle goes into the lock mechanism. Provides protection without the hassle of having to put on and take off a padlock at multiple stops. Reduces theft from driver forgetting to use padlock. Easy to install. Includes a high security ABLOY® lock cylinder or interchangeable core housing. The lock works only on Whiting trailer doors.

\*If you are interested in possibly adding Air Cuff Locks to a master system in the future, we need to be notified before system is created.
